

Cadence

Goal Setting & Performance Tracking Portal

AtomQuest Hackathon 1.0 — Complete enterprise performance management, from goal creation to quarterly analytics.

Live Demo: cadence-growth.vercel.app

The Problem

- Enterprises track goals in spreadsheets — no version control, no audit trail
- Managers can't see team progress without manual follow-ups
- Quarterly check-ins are subjective; scoring is inconsistent across departments
- Admins have zero visibility into org-wide completion rates

The Solution

Cadence digitizes the full performance cycle:

1. **Admin** opens a cycle (e.g., FY 2025-26)
2. **Employees** author weighted OKRs with real-time validation
3. **Managers** approve or return goals with one click
4. **System** auto-advances phases, auto-scores check-ins via 5 UoM formulas
5. **Admin** monitors completion, runs escalation nudges, exports analytics

Key Metrics

9 Cycle Phases	5 Auto-Scoring UoM Formulas	8 Thrust Areas
3 Role Views (Employee / Manager / Admin)	Zero Backend Code	100% Free Tier

What We Built

Phase	Features
Goal Setting	Weighted OKRs, live weightage bar, auto-validation (100%, min 10%, max 8 goals), submit for approval, manager return-to-draft
Check-ins	Quarterly entry (Q1-Q4/Annual), 5 UoM formulas, achievement vs target viz, manager comments
Admin	Cycle open/advance/reset, user management, goal force-reset, full audit log, analytics with charts, CSV export, escalation engine with email (Resend)
UX	Role-aware Dashboard, demo view switcher, landing page, fast caching, error states everywhere

Tech Stack

Layer	Tech	Why
Frontend	React 18 + Vite + TypeScript	Fast DX, type-safe
Styling	TailwindCSS + shadcn/ui	Accessible, consistent
State	Zustand + TanStack Query	Caching, minimal boilerplate
Data + Auth	Supabase (Postgres + RLS)	Security at DB layer, no backend
Charts	Recharts	Lightweight, React-native
Email	Resend	100 emails/day free

Hosting	Vercel	Auto-deploy from GitHub
---------	--------	-------------------------

Cost Optimisation

Free tier on **every layer**:

- Vercel — unlimited static hosting
- Supabase — Postgres + Auth + 500 MB
- Resend — 100 emails/day

Zero server management. Zero backend code.

Demo Flow for Judges

All passwords: cadence123

Account	Role	What to Show
admin@cadence.demo	Admin	Open Cycles → Users → Analytics → Escalations. Use Demo View switcher to flip roles.
manager@cadence.demo	Manager	Review Team goals → Approve/Return → Check Team Check-ins
priya@cadence.demo	Employee	Create goals → Submit → Record quarterly check-ins

Why Cadence Wins

- **Complete E2E:** Not a prototype — every role has a real workflow
- **Smart scoring:** 5 UoM formulas eliminate subjective manager bias
- **Production-grade:** RLS, audit logs, error handling, caching — not a toy
- **Instant demo:** One-click role switcher, demo seeder, live deploy
