

Cadence — User Manual

For Hackathon Judges — How to test every role and feature in 5 minutes.

Quick Access: cadence-growth.vercel.app

All passwords: cadence123

Test Accounts

Email	Role	What to Test
admin@cadence.demo	Admin / HR	Everything — cycles, users, analytics, escalations
manager@cadence.demo	Manager (Rohan)	Review team goals, approve/return, check-ins
priya@cadence.demo	Employee	Create goals, submit, record check-ins
arjun@cadence.demo	Employee	Same as Priya

Flow 1: Employee Creates Goals

Step 1: Log in as Employee

1. Visit cadence-growth.vercel.app
2. Click **Employee** under Demo Accounts (or enter `priya@cadence.demo / cadence123`)
3. You'll land on the **Dashboard**

Step 2: Create Goals

1. Click **My Goals** in the sidebar
2. Click **+ Add Goal**
3. Fill in: Thrust area, UoM type, Target, Weightage %, Goal title, Description
4. Watch the **live weightage bar** update (orange = incomplete, green = 100%)
5. Add more goals until total weightage = 100%

Validation enforced:

- Total weightage must equal exactly 100%
- Each goal needs at least 10% weightage
- Maximum 8 goals allowed
- Each goal must have a title

Step 3: Submit for Approval

1. Once weightage bar shows **100 / 100% Ready to submit**
2. Click **Submit for approval**
3. Status changes from "Draft" → "Submitted"

Flow 2: Manager Reviews & Approves

Step 1: Switch to Manager

1. Log out → Log in as **Manager** (`manager@cadence.demo`)
2. Or if logged in as **Admin**, use the **Demo View** switcher (top right) → select **Manager**

Step 2: Review Team Goals

1. Click **Team** in the sidebar
2. See list of direct reports (Priya, Arjun)
3. Click an employee name to open their goal sheet
4. Review each goal: title, thrust area, target, weightage

Step 3: Approve or Return

1. Click **Approve all** to lock all goals at once
2. Or click **Return** on a specific goal to send it back to draft with a comment
3. Approved goals show a green **Locked** badge

Flow 3: Employee Records Check-ins

Prerequisite

Check-ins only open when the Admin advances the cycle phase to Q1, Q2, Q3, or Q4/Annual.
If cycle is in "Goal Setting", check-ins page will show "Check-ins are not open yet."

Step 1: Advance Cycle (as Admin)

1. Log in as **Admin** (or use Demo View switcher)
2. Go to **Cycles**
3. Click **Advance** on Q1 to open quarterly check-ins
4. (If needed later, click **Reset to Goal Setting** to go back)

Step 2: Employee Records Progress

1. Log in as **Employee**
2. Click **Check-ins**
3. Enter **Actual Achievement** for each goal
4. System auto-computes score using the UoM formula
5. Click **Save Check-in**

Flow 4: Admin Analytics & Governance

Analytics

1. As **Admin**, go to **Analytics**
2. View: Total goals, approved count, completion rate by department
3. Charts: Bar chart (dept stats), Pie chart (goal distribution), Line chart (score trends)
4. Click **Export CSV** to download a report

User Management

1. Go to **Users**
2. Click **Edit** to change a user's name, email, or role
3. Click **View Goals** → **Reset** to force-return a locked goal to draft

Escalations

1. Go to **Escalations**
2. Toggle rules on/off (Checkin Overdue, Goal Not Submitted)
3. Edit day threshold
4. Click **Trigger Manual Check** to run the escalation engine
5. View sent notifications in **Escalation History**

Flow 5: Demo Data Seeder

- 1. As **Admin**, go to **Dashboard**
- 2. Find the **Generate Demo Data** card
- 3. Click **Seed** — instantly populates 4 realistic goals for every employee
- 4. Refresh to see the seeded goals in My Goals / Team pages

Pro Demo Tip: Log in as Admin, click **Seed**, then use the **Demo View** switcher to flip between Employee, Manager, and Admin to show the full seeded workflow without any manual data entry.

Troubleshooting

Issue	Fix
"Supabase not configured" banner	Vercel env vars not set. Admin must add <code>VITE_SUPABASE_URL</code> and <code>VITE_SUPABASE_ANON_KEY</code> in Vercel project settings.
"Check-ins not open yet"	Admin needs to advance cycle phase from Goal Setting to Q1/Q2/Q3/Q4.
Can't submit goals	Total weightage must equal exactly 100%. Check the weightage bar.
Page shows 404 on refresh	This was a Vercel SPA routing bug. Fixed in <code>vercel1.json</code> . Redeploy if still happening.
